► KEY FEATURES

Protective Cover is designed to protect the gate in permanent outdoor installations during periods of inactivity from water, ultraviolet rays, humidity, dirt, sand, temperature spikes and other environmental hazards.

The Protective Cover is column-fitted, durable and weather-proof. Yet it is also breathable, allowing moisture to evaporate from inside.

By reducing the need for maintenance, the cover improves Detector readiness for its operators.

The cover is simple to install and to remove.

► TECHNICAL DATA

FABRIC COATING	PVC
FINISHING	Fungicidal treatment, smooth lacquering on both sides
TOTAL WEIGHT	520 g/m ² [EN ISO 2286-2]
TRACTION RESISTANCE WARP/WEFT	2100 / 2000 N/50 mm [EN ISO 1421/V1]
LACERATION RESISTANCE WARP/WEFT	180 / 150 N [DIN 53363]
HEAT TOLERANCE	+70 °C
COLD TOLERANCE	-40 °C
WEATHER TOLERANCE	7-8 Note, Value [EN ISO 105 B04]
