Strict requirements and detection needs call for security checkpoints to perform efficiently even under very challenging conditions.

The **O2PN20/EZHD detects firearms and knives**, even when they are **hidden within body cavities**, and accurately indicate the position of the threat, its intensity and its prevalent composition.

THE 02PN20/EZHD SATISFIES ALL THE REQUIREMENTS

MOST POWERFUL AND VERSATILE SECURITY FEATURES

- Up to 50 built-in Security Programs
 - ▶ Up to 30 International Standards
 - ▶ Up to 20 Customizable Levels

Setting the Security Levels could not be easier and more versatile than in the 02PN20/EZHD.

Users can choose directly from the known International Standards or request implementation of a Standard personalized to their own requirements. Users can also create their own program and save it in internal memory for later use.

- Chip Card system for fast, simple and secure parameter changes (i.e. alarm volume and tone, counter reading, etc.) and security level selection.
- Any security standard can be enhanced with selectable random alarm probability

CHIP CARD SYSTEM

The system allows Security
Management to **set the Security Level quickly, reliably** and without having to
program the device in any way.

The **O2PN2O/EZHD** has a very low nuisance alarm rate even at the strictest Security Standards requested today, and therefore allows high transit flow rates and the minimum need for intervention by inspection personnel.
